

Appendix M

Walk Bike Columbia

The Walk Bike Columbia Pedestrian & Bicycle Master Plan, adopted in 2015, is the result of a comprehensive public planning effort, and was initially adopted as an addendum to the transportation section of The Columbia Plan: 2018. As the Walk Bike Columbia Plan envisions closer to a 20- to 30-year build-out of infrastructure, the entirety of the plan is carried forward as an appendix to Columbia Compass.

APPENDIX M

Introduction

The *Walk Bike Columbia Pedestrian & Bicycle Master Plan*, adopted in 2015, is the result of a comprehensive public planning effort, and was initially adopted as an addendum to the transportation section of *The Columbia Plan: 2018*. Built upon eight key goals (shown to the right) and an extensive analysis of existing conditions at the time of planning, the plan examines priorities for programs, policies, and a long-term build out of pedestrian and bicycle infrastructure, as well as a bike share feasibility study.

Due to the comprehensive and long-term approach taken during the Walk Bike Columbia planning process, it is critical that this plan is not left behind with the adoption of Columbia Compass to replace the prior 10-year update to the comprehensive plan, *The Columbia Plan: 2018*. Though the City will continue to build upon the recommendations of Walk Bike Columbia, and in some cases amend or modify these recommendations through updates to Columbia Compass, it is the intent of *Columbia Compass* that *Walk Bike Columbia* be carried forward in its entirety as a longer-term plan. As such, the entirety of the *Walk Bike Columbia* plan document is incorporated as an appendix of *Columbia Compass*.

Incorporated herein by reference, the plan documents can be accessed using via the City's website, as follows:
